

Essence

Watermelon

Description

Essence is a triploid watermelon with a very strong plant from seeding to harvest. Potential to produce very high yields of quality fruit, with average fruit weight being 8-10kg mid-season in North Queensland and up to 15kg mid-season in southern Australia.

Very adaptable to a wide range of growing conditions. Flavour and texture are a feature of Essence. Crisp firm flesh holds well in the field and post harvest. Dark green skin with light green stripe and deep red fruit combine for an attractive presentation on the shelf.
