

P-27

Watermelon

Description

P-27 is a specialised seeded diploid watermelon variety used as an early-flowering pollen donor for seedless watermelon crops.

P-27 plants produce prolific male flowers over a long period to ensure viability, while growing small, inedible fruits that are easily distinguishable from the main harvest. Provides viable, compatible pollen.

Category

Pollinator

Tolerance

HR: Px IR: Fusarium

Pack Size

500 / 5,000 / 10,000 seeds
