

Coral

Melon

Description

The Coral is a high-performing commercial hybrid rockmelon. It is highly regarded as a main-season variety valued for its excellent fruit quality and reliable performance under challenging conditions.

Deep orange flesh known for its exceptional, sweet taste. Notably, it has a very small, tight seed cavity, which means growers and consumers get a higher percentage of edible flesh per melon.

The vine is exceptionally well-balanced and develops a strong, protective foliage cover that shields the developing fruit from sunburn. It is known for achieving a good crown set, meaning the fruit concentrates reliably around the main base of the plant.

Coral is specifically bred to set fruit exceptionally well under hot conditions, making it highly dependable for peak Australian summer conditions. Intermediate Resistance (IR) to Fusarium Wilt (race 2) and Powdery Mildew (Px).

Species

Rockmelon

Type

Hybrid

Maturity from sowing

11 - 14 weeks

Fruit Shape

Round / Oval

Weight

1.8 - 2kg

Skin

Dense netted

Internal Colour

Deep orange

Pack Size

2,500 / 5,000 / 10,000 seeds
